RELIGIOUS EDUCATION

Religious Education at Monivae College aims to prepare students to be lifelong learners and global citizens in a pluralist society where multiple worldviews co-exist. The Monivae Graduate is provided a quality Catholic education so that each person may know and be invited to experience the living spirit of Christ, informed by the Charism of Jules Chevalier and the Missionaries of the Sacred Heart.

The Monivae Religious Education Graduate will have learned about the life and message of Jesus Christ through the study of Scripture and discern what it means for them to respond to his message in their own lives. This response includes quality Christian relationships with those they meet and with whom they live, acting in a morally compatible manner with Christ's message and the growing development of a life of faith, leading to the hope of God's Kingdom on earth and after death.

Monivae College enrolls students from all places on the continuum of Christian belief and degree of participation in the life of a Christian community. For some it is their first and only encounter with the word of God. For others it is an opportunity to deepen their faith and enhance their life in the Church. Religious Education provides the opportunity for all to participate meaningfully in the activities and processes of the course without judgment or discrimination. Students are expected to remain open to the word of God and to participate meaningfully in all activities.
